

PREREQUISITE CHART FOR TARGET T

4 required / 1 verified / 3 remaining

filled: known outline: ready, the frontier where probe items are drawn tinted: blocked

SHORTEST KNOWLEDGE-STATE PATH FROM EMPTY MASTERY

4 transitions = $|R(T, \{\})| = 4$ required concepts

the chain F, A, T has 3 nodes and never reaches T: after {F, A}, T is still blocked by B

swapping A and B gives a second optimum; the minimum is a count, the order is a certificate
