

AGFarms Grants — Executive Brief

For: external grant writer + their drafting agent · Date: 2026-05-05 · Repo: github.com/bucket-foundation/bucket-foundation (public, MIT)

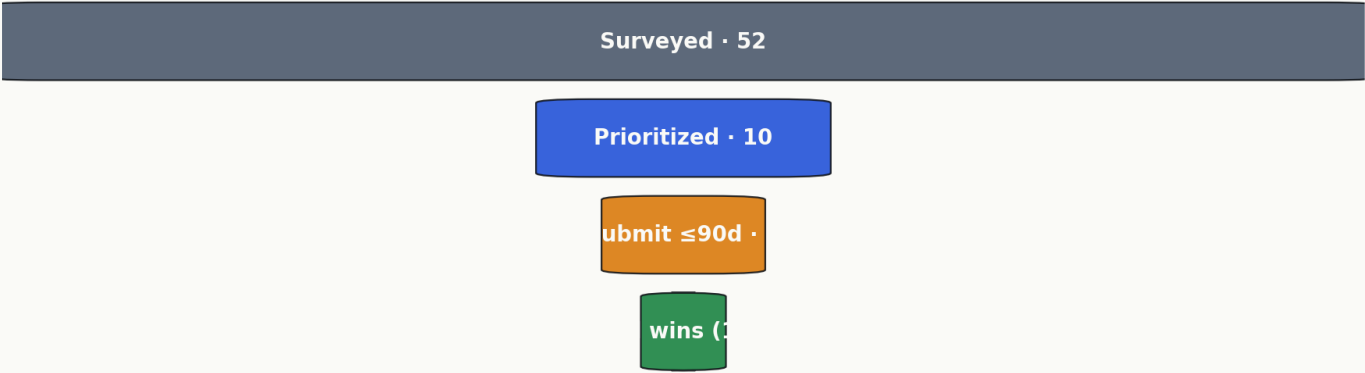

build the past. build history. bucket is the new renaissance.

1 · ENTITY MATRIX

Entity	Status	EIN	SAM	Use for
AGFarms LLC	DE for-profit, active	✓ ops vault	⌚ filing	NSF SBIR · NOAA · USDA
MamaTeeTees	501(c)(3), active	✓ on file	⌚ filing	GlobalGiving · Mastercard · Segal
Bucket Foundation	personal capacity, c3 pending	✗ none	✗ blocked	Sloan · EF ESP · Gitcoin · NSF POSE (post-c3)
HCB (interim Bucket sponsor)	501(c)(3)	✓ 81-2908499	✓ active	federal apps until Bucket c3 lands

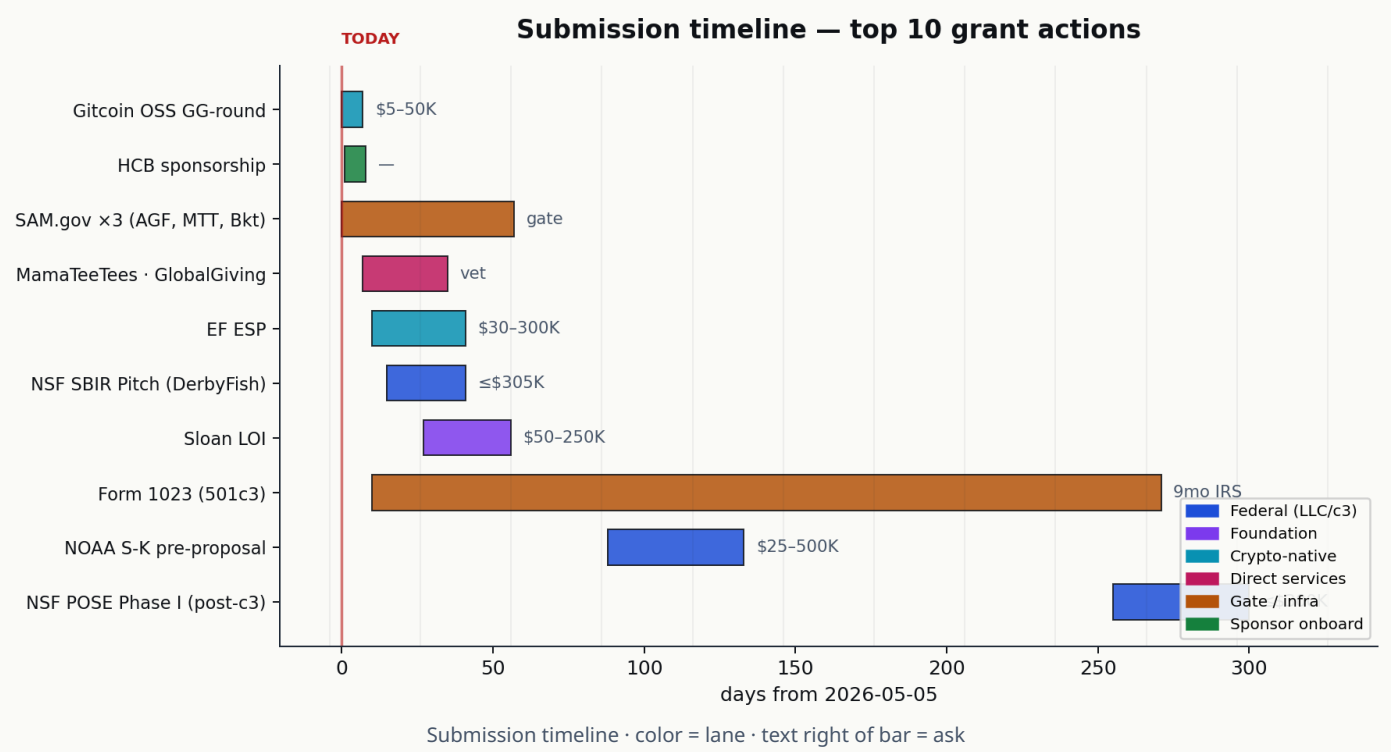

2 · PIPELINE AT A GLANCE

Pipeline funnel — 52 opps → expected wins

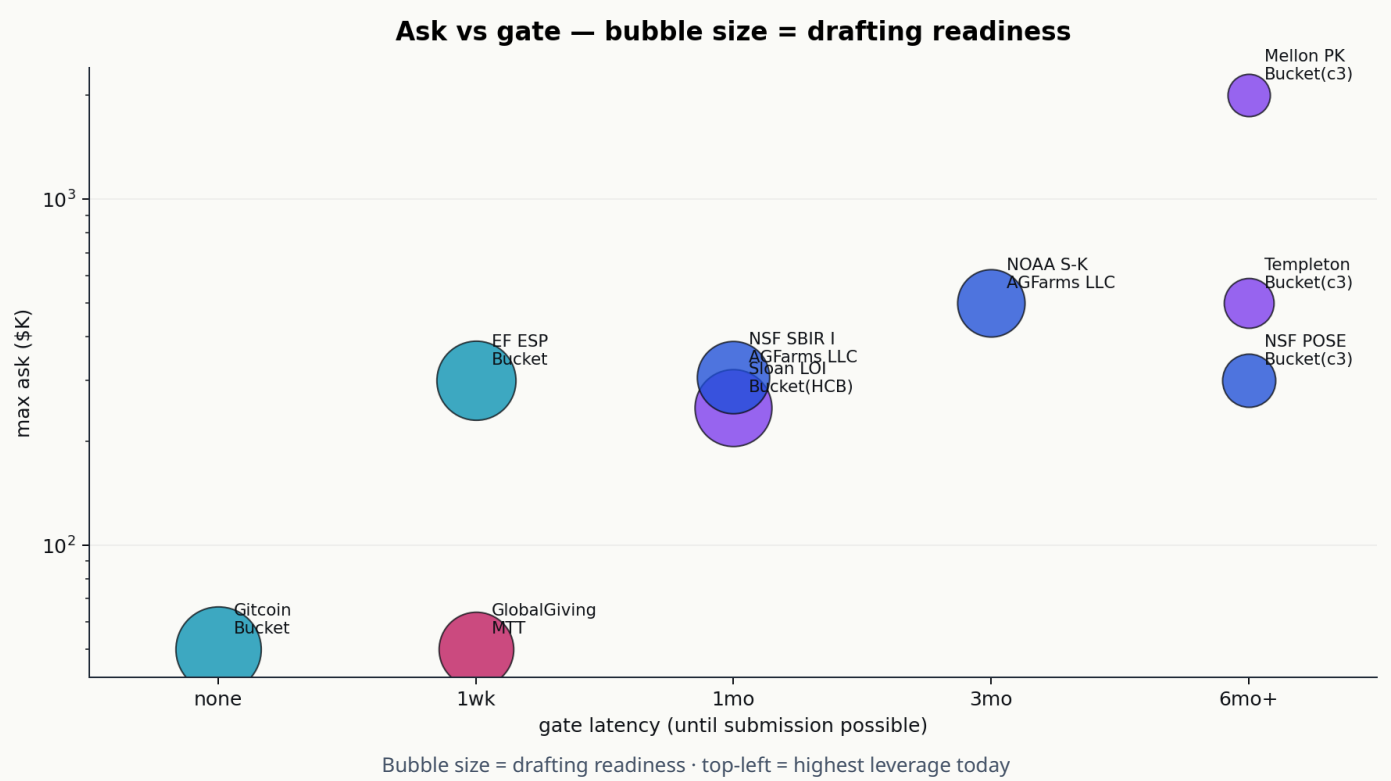

Funnel · 52 surveyed → 5 priority submissions in 90 days → 2 expected wins (12mo)

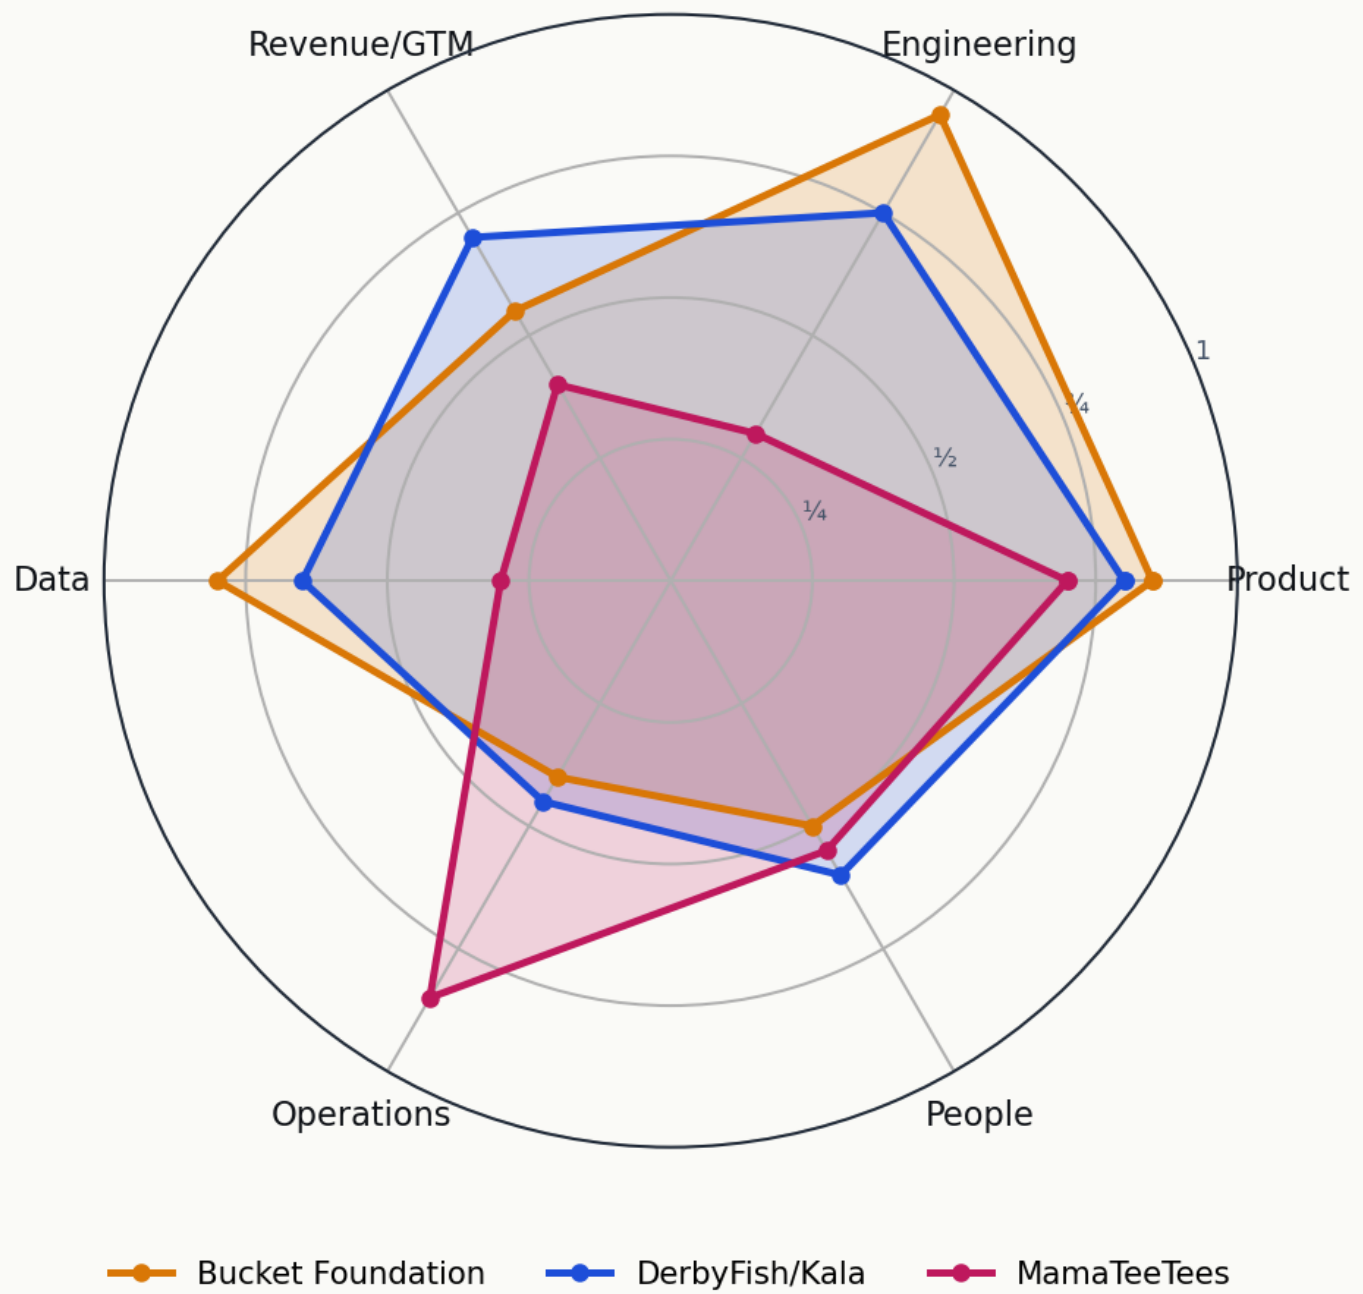

3 · TOP 10 ACTIONS ON A CALENDAR

4 · ASK VS GATE (WHERE TO SPEND WRITING TIME)

Cross-pillar readiness per venture

Per-venture self-rating · gaps = where pillar work is needed before submit

6 · SUBMIT-ORDER — TOP 5

#	Grant	Entity	Ask	Lane	Gate	Submit by
1	Gitcoin OSS GG-round	Bucket	\$5-50K match	crypto	none	NOW
2	GlobalGiving Accelerator	MamaTeeTees	vetted	direct	video + Candid	2026-06-09
3	EF ESP	Bucket		crypto		

			\$200K (band \$30–300K)		wallet + audit	mid-Jun 2026
4	NSF SBIR Phase I (Project Pitch)	AGFarms (DerbyFish)	≤\$305K	federal	SAM	mid-Jun 2026
5	Sloan Exploratory LOI	Bucket	\$50–250K	foundation	HCB letter	Jun 2026

Runners: NOAA Saltonstall-Kennedy (DerbyFish, Aug NOFO) · NSF POSE Phase I (Bucket, FY27 post-c3) · Templeton OFI (Bucket, Q4 2026)

7 · CROSS-PILLAR ANALYSIS

Product

- Bucket = **infrastructure for research**, not a research project. Don't pitch as content.
- DerbyFish = citizen-science fisheries data with cryptographic provenance. Federal hook.
- MTT = direct-services nonprofit. Hook = local leadership + measurable retention.

Engineering

- grants-gateway shipped. Real Anthropic synth + real x402 facilitator wired. Live x402 merchant on Base = differentiated proof.
- Bucket TLS + Nucleus instance live as of 2026-05-04.
- 17,211-row corpus from grants.gov / NIH / NSF / USAspending / 990-PF.

Data

- bucket-canon master taxonomy (gdrive) — 7 branches, ~76 contributor index.
- Kruse Index (460 articles, FTS5+MiniLM+RRF) is biophysics seed corpus.
- Lean on this for any open-science / primary-research pitch.

Revenue / GTM

- LLC eligibility unlocks **NOAA + NSF SBIR today** — no c3 wait.
- Crypto-native lane (EF, Gitcoin, Protocol Labs) = open regardless of c3.
- Foundation lane (Mellon, Templeton, Pew, Walton) = 6–12mo cultivation horizon.

Operations

- **SAM.gov 4–8wk** is single biggest gating risk. File in week of 2026-05-05.
- Bucket has no EIN. Path A (HCB sponsor) or Path B (NY/NJ → SS-4 → SAM, 8–14wk).
- Form 1023 May 2026 → determination Q4 2026 / Q1 2027 → unlocks FY27 NSF POSE.

People

- Founder: Gianangelo Dichio · gianyrox@gmail.com · sole canonical author.
- CTO: Anthony Tedesco — cite for SBIR engineering credibility.
- **0 NOAA scientists in Rolodex.** Highest-leverage cultivation = warm one regional NOAA Fisheries scientist before Aug 2026 NOFO.

8 · DRAFTING CHECKLIST (GIVE TO YOUR CLAUDE)

Reading order

- **MANIFESTO.md** — voice + thesis
- **PROTOCOL.md** — what Bucket actually builds
- **GOVERNANCE.md** — COI disclosure (founder personal capacity)
- **grants-targets/INDEX.md** — portfolio strategy
- **grants-targets/{venture}.md** — per-venture rationale
- **grants-targets/drafts/*.md** — current drafts (Sloan/EF/Gitcoin)
- **private/grants/*** — request access (SAM checklist + MTT GG draft)

Per-application checks

- Confirm correct legal entity (LLC vs c3 vs HCB-sponsored)
- Confirm SAM/EIN status before any federal app
- Use slogan ladder in voice, never literal
- Include COI disclosure where Bucket is applicant
- Cite live numbers: 17,211 corpus rows · 7 canon branches · ~76 contributors · feed402 v0.2 · 7 live x402 endpoints
- No hyperbole. Funders index for specificity.
- All drafts pushed to **grants-targets/drafts/** for review before submit

9 • NON-NEGOTIABLES

- × Don't pitch Bucket as a research project. It's **infrastructure for research**.
- × Don't pitch AGFarms LLC to c3-only funders (Mellon/Templeton/Pew/Walton).
- × Don't submit unverified MamaTeeTees stats — TODOs in `private/grants/mamateetees-globalgiving.md` must be resolved with country coordinator first.
- × Don't bury feed402 / x402 / Base in jargon. Translate: "users pay tiny amounts to query primary research; authors get paid each time their work is cited."
- × Don't submit without grants-gateway citation — it's operating proof.
- ✓ Cite the live system every time. grants-gateway + x402-research-gateway are working merchants on Base.
- ✓ Lead with specificity. Numbers > adjectives.
- ✓ Honor the slogan ladder.

10 • FOUNDER-BLOCKING ACTION ITEMS

- Pull AGFarms LLC EIN from ops vault
- Pull MamaTeeTees EIN + state articles
- Decide Bucket NY vs NJ incorporation
- File SAM ×3 (AGFarms, MTT, Bucket post-EIN)
- Submit HCB application
- Designate Base mainnet wallet for EF ESP disbursement
- Identify smart-contract audit vendor for EF ESP M2 (OpenZeppelin / Trail of Bits / Spearbit)
- Produce 60s MTT video (country coordinator + scholar B-roll)
- Verify Candid vetting docs (IRS det. letter + 3yr 990s + 2yr financials)
- Send first NOAA scientist outreach email (NJ or FL regional)
- Export creds + run `./grants-gateway/deploy.sh --seed-secret` for live merchant
